## DETAILED ACTION

### ***Claim Objections***

1. Claim 8 is objected to because it has no period at its end.

### ***Claim Rejections - 35 USC § 112***

2. Claims 5, 7, 9, 10 and 12-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 5, 7, 9, 10 and 12-20 are indefinite because in claim 5 (and claims dependent thereon) it cannot be determined whether the phrase "comprising as comonomers to ethylene at least two C<sub>4-12</sub> alpha olefins" is meant to require: a) two ethylene copolymers wherein each includes a different C<sub>4-12</sub> alpha olefin, or b) a terpolymer wherein ethylene is copolymerized with two C<sub>4-12</sub> alpha olefin monomers.

Applicant's arguments filed 6/29/2007 have been fully considered but they are not persuasive. Applicants appear to be arguing that whether a polymer is multimodal is related to whether or not a terpolymer is present. However, this argument is neither correct nor relevant. The modality of a polymer is determined by the relative molecular weight distributions of the components, and has nothing to do with whether the components are homo-, bi-, or ter-polymers. However; this is beside the point. The issue is the meaning of the phrase "comprising as comonomers to ethylene at least two C<sub>4-12</sub> alpha olefins." The ordinary meaning of describing polyethylene as comprising two

comonomers would require that ethylene and two additional monomers are polymerized into the same chain. However, the claims appear to include embodiments which include no polymer chains comprising ethylene and two additional monomers.

3. Claims 6-8 and 10 rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

In claims 6-8 and 10, "bimodal" has been changed to "multimodal" for the particular embodiments claimed. However, although the specification has generically used the term "multimodal," no support exists for redesignating the claimed species as multimodal. Claim 6 is exemplary: the specification at page 8 discloses these embodiments only as bimodal, with no general statement that they may also be multimodal.

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Art Unit: 1713

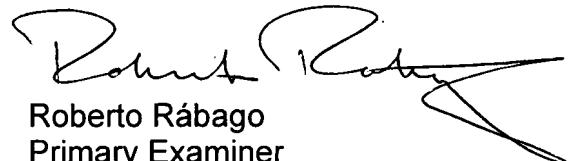

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
